Flow Switch Module

Anemometric flow switch for air / gas. The compact air velocity switch with switched ground output for direct control or alarm purposes is designed for use in air and non-corrosive, non-flammable gas atmosphere

The iST flow switch monitors and controls the flow rate non-corrosive gases. It measures flow rates and sends trip signals, triggering specific actions within a flow monitoring system. Ideal for environmental monitoring in HVAC systems.

Product Name: Flow Switch Module V1.0

Medium: Gas Flow

Betriebstemperaturbereich: -20 °C to +80 °C

Gehäuseabmessungen: 30 x 76 x 10 mm

Anschluss: S4B-ZR-SM4A-TF / JST

Messbereich (full bridge mode): 0.1 to 15 m/s

Ansprechzeit T63: < 3 s

Gewicht: 30 g

Speisespannung: 24 V (18..28 V)

Ausgangssignal: switched ground, max 0.7 A/60 V

Product code: 156027
