FS7 EvaKit

Flow Demo Board with FS7 Sensor: evaluation electronics for anemometric (thermal) flow sensors

Ideal for testing FS7 sensors in your application.

Product Name: Flow Eval Board FS/OOL + FS7 gas sensor
Measured medium: Gas Flow
Operating temperature range: -40 °C to +85 °C (module)
Flow range: 0 m/s to 50 m/s
Connection type: PCB connector
Supply voltage: 5V DC +/-5%
Output signal: 0 V to 10 V analog
Housing: 45 x 25 mm
Product Old code: 160.00023
Product code: 104018
