

# Biosensor IV4 for Lactate measurement

Flexible strip-type biosensor for dip-in applications

Flexible strip-type biosensor, optimal for dip-in applications. Designed for the detection of one single analyte (lactate as standard). Ideal for applications that require in-line continuous measurement with high reliability.

Note: Not for medical, diagnostics and use on humans. For evaluation use only. For more information contact IST AG.

**Product Name:** B.IV4.L.1X.IDC

**■** Lactate

**■** 10.0 x 4.0 x 0.4 mm (H with flow cell: 1.23 mm)

**■** Strip-type with 4 electrodes: : 1x glucose, 1x blank, 1x reference, 1x counter

Platinum covered with enzyme membrane  
For background compensation  
Silver / silver chloride  
Platinum  
0.05 mM to 25 mM / 0.01 to 4.5 g/l  
Not compatible  
6 months (at recommended storage conditions)  
4 weeks in analyzer mode  
**Product Old code:** 390.00340  
**Product code:** 105191

## Product details

### Benefits & Characteristics of the IV4 biosensor

Further advantages of the IV4 biosensor include:

- Excellent long-term stability
- Long shelf life
- Gamma and beta sterilization compatible
- Fast response time and outstanding reliability
- Reference, counter and blank electrodes on-chip

Given its compatibility with gamma radiation, the IV4 sensor can be used for example in bioreactors or aseptic media.

### Disclaimer

Evaluation product for professionals to be used solely for research and development purposes! Not for medical and diagnostic use. Not to be used on humans. For more information contact IST AG.

### Quality

Consistent with the well-known, high-quality standards in Switzerland, IST AG is certified according to ISO 9001:2015 (quality) and ISO 14001:2015 (environment). Appropriate processes are part of our daily work. They are regularly audited and

extended parallel to the growth of our company.
